

Minutes from B88 Safety Meeting

June 1, 2007

- 1) Student Safety
 - Make sure students are trained and informed of hazards
 - This applies to contractors as well
 - Discussion of Stop Work Policy – we are obligated to do this
- 2) Sandals
 - Not allowed at B88
 - Proper foot protection is important
 - Chemicals, tools, etc., are hazards
- 3) Confined Space Issues
 - Discussion of importance of confined space permit
 - If someone inside a confined space drops or passes out, the person outside should not go in after them
 - Keep students aware of confined spaces
 - All confined spaces are marked
 - You must have training to enter a confined space – This is an EHS course
- 4) Safety Communication (LN Spills, Water Line Breakage, Electrical Over Heating)
 - Call 7911
 - Notify other people!!!
 - MSDS – on web and in binders at B88
- 5) Building Evacuation Guidelines
 - Different at B88 than other buildings
 - Just leave the building!!! Do not go around alerting others
 - Account for people once you get out
 - Use closest exit and walk around to the gathering point
- 6) MESH Review
 - SRC members may contact you
 - All areas can be covered (Job safety, housekeeping, training)
 - SRC will submit a report and forward it to Steve Chu and DOE
- 7) Qualified Electrical Workers
 - Discussion of different electrical breakers at B88 and operating them
 - Cotton clothing should be worn around breakers
 - Lockout/Tagout procedures and policy
- 8) Crane Safety
 - Signs are posted re: crane safety

- Never walk under a suspended load
- Use hard hats when near an operating crane

9) Building 88 Truck

- Remember to set emergency brake
- This is a good practice to use at all times

10) Safety Walkarounds

- Should be done four times per year
- First qtr has not shown good results
- Everyone should keep their eyes open for hazards
- Call Marty White with questions
- Forward walkaround forms to Marty
